PROJECT OBJECTIVES

The following things comes under Project Objectives

- ➢ Respond behind choosing this particular project
- ➢ Abstract for the Project "IoT Based Safety Gadget

    for Child Safety Monitoring and Notification
- ➢ Brainstorming

PROJECT OBJECTIVES:

       In the existing system, we use a voice recognition module in which the alert commands from the child are stored and kept for further reference. If the same child delivers the same command, it will compare with the alert command which was previously stored and sets an emergency level according to the alert command. The GSM has a SIM which is used to send an alert message or an alert call to the trusted peoples. GPS is used to track the live location and it is used when needed. The server will search the respective device ID from the database and search for respective contacts according to that device ID and helps in alerting the registered guardians.
